

## 40V 250mA Ultralow-Quiescent-Current LDO

### ■ DESCRIPTION

The HM73XXHB ultra-low quiescent current regulator features low dropout voltage and low current in the standby mode. With less than  $1.5\mu\text{A}$  quiescent current at no load, the HM73XXHB is ideally suited for standby micro-control-unit systems, especially for always-on applications like E-meters, fire alarms, smoke detectors and other battery operated systems. The HM73XXHB retains all of the features that are common to low dropout regulators including a low dropout PMOS pass device, short circuit protection, and thermal shutdown.

The HM73XXHB has a 40-V maximum operating voltage limit, a  $-40^\circ\text{C}$  to  $125^\circ\text{C}$  operating temperature range, and  $\pm 2\%$  output voltage tolerance over the entire output current, input voltage, and temperature range. The HM73XXHB is available in a TO92 through-hole and SOT235, SOT223, SOT893 surface mount packages.
